

- Terminal Applications**
- SQL Editor** Freeform Editor To Write Queries And Reports
 - EZQ Editor** Menus and Lists To Write Queries And Reports

Choose the way you prefer to create custom queries and reports.

With the SQL Editor, you can use a free form editor with KB_SQL syntax to create complex query and reporting structures, and develop custom report views. With the EZQ Editor, you can create queries using a simple form. Either way, you can access your data and generate reports quickly and easily.
